

$\$50,000 \times 40 \text{ years} = \$2,000,000$

- . If you received \$1,000 a day, seven days a week, how long would it take to reach a billion? The answer is that it would take you 2,737 years, 10 months, and 7 days to reach a billion.
- . If you were to count to 1 million, it would take you about 11 days. To count to 1 billion would take about 30 years.
- . If you received \$1 every second for your entire life, and you just reached \$1 billion dollars, when were you born? The answer is 1976 (a billion seconds is just over 31 years).

If we wanted to make a book with a billion dollar signs, printed 1,000 per page and with pages printed on both sides, our book would be 500,000 pages long.
