

modern technology is overtaking the world one step at a time. Advancements in technology have made a possibility of having an addiction to phones, computers, and anything to do with technology. Today's new generation will have to grow up using all this technology, which could become a major problem as the youth do not know how life was without the help of technology. Technology has helped make life easier, but with constant use, technology is becoming a necessity for humanity.

Technology has brought the possibility of social media. Platforms such as Instagram, Snapchat, ~~and Tik Tok~~ ~~are~~ ~~popular~~ Facebook, and Tik Tok are popular amongst teenagers and even adults. Social media is a way for people to connect and have fun with one another. However, social media makes very unrealistic standards for human lifestyles. Normalization of drugs, alcohol, pornography in media in general is brainwashing today's youth, ~~to expect something to be~~ making the thought that ~~the~~ certain things are normal since they see people ~~in do it on th a social media app, or on in a movie.~~ in all types of media portraying ^{certain deeds} it as fun. This all causes kids to grow up faster, and miss the childhood stage, just because they want to fit in.

~~Developed countries~~ Overuse of modern technology is mostly a problem ~~in~~ just in developed countries. ~~to~~ the United States, Canada, and Japan are all examples of developed countries. Modern technological advancements are seen ~~covering~~ every step throughout urbanized countries. The problem comes in when the advancements need to be made, as the processes that make these

Question Part

advances possible harm the environment. The United States has an ecological footprint that bypasses the country's available biomass. Being number one in most developed countries and Gross Domestic Product (GDP), the U.S. has ~~become a major~~ damaged their environment by creating new unsustainable technologies. With all of these ~~many~~ new ~~advance~~ technologies, the thought of what technology will do to the environment should be accounted.

~~modern modern~~ technology keeps Use of modern technology ~~is~~ continues to grow, as businesses and tech manufacturers are hungry for money. Advertisements for new technology are seen displayed everywhere a person could see, and take account. Technology ~~slowly~~ is slowly starting to take over everyday human lives. Companies such as Apple, Microsoft, and Amazon are constantly seen trying to come up with new products that replace human tasks with technology. People buy into this money scheme, as constant advertisement for these products are shown, along with the idea of having a ~~simpler~~ simpler life. Although ~~technological advances~~ the thought of technological advances taking over lives is not as evident now, the thought will become more evident as years go by, and more advances will be made.

Technology may do damage to human spirit, ~~some~~ but many benefits of technology help the human body. Before, the thought of someone with an amputated limb being able to use that limb ever again seemed impossible. As ~~times~~ went by, more research was done on how to use technology for medical purposes. Now, research has helped make prototypes for robotic limbs to restore an amputated limb. This helps with the human body, as
